Steven Andrews Engineering prepared plans and specifications for three (3) intertie connections between the City of Anaheim and the Yorba Linda Water District water lines. The first intertie was located on Fairbury Lane known as the Anaheim Intertie No. 12, work included the replacement of the existing 10-inch flow meter with a new 10-inch Sparling propeller meter with forward and reverse remote reading register. The second intertie was at Crystal Drive also known as Anaheim Intertie No. 15, work included the replacement of the existing below grade meter vault and valve vault including 16-inch piping and replacing with a new precast concrete vault and installing a new 12-inch flow meter with remote forward and reverse reading register. The last intertie was located at Willow Woods Drive also known as Anaheim Intertie No. 14. This work included the installation of a new precast meter vault, new 8-inch ductile iron piping and appurtenances placed on the street sidewalk near the intersection of Willow Woods Drive and Willow Woods Lane.
