Steven Andrews Engineering was retained by the Watson Land Company to prepared plans and specifications for the construction of 9,600 lineal feet of 24-inch PVC C905 domestic water main within street right of way. The pipe alignment started at the Eastside Water Treatment Facility right of way easement on Schaefer Ave and continued South along Bon View Avenue and was connected to an existing 24-inch domestic water main at the intersection of Bon View Avenue and Merrill Avenue.

The pipeline project consisted of the installation of inline valves, blow off's, airvac's, thrust blocks, fire hydrants and street pavement replacement. Steven Andrews Engineering was in constant coordination with City staff and contract to have this pipe line installed in time for the Eastside Water Treatment Facility to be operational. Steven Andrews Engineering provided management support during bidding and construction.
